

## **Anti-Corruption Statement**

The Northern Powergrid Group will always act honestly, openly, fairly and ethically wherever it does business. We are committed to preventing corruption in all its forms and do not tolerate it in our business or in those with whom we do business. We strive to uphold all laws aimed at countering corruption, including the Bribery Act 2010, in all the countries in which we operate.

The Group has a zero-tolerance approach to corruption and requires staff, suppliers of services and business partners to comply with Bribery Act 2010. Our policies encourage an employee who has any suspicion of bribery or other form of corruption within or related to the Group to report the suspicion to a manager.
